

**Navy Provides Notice Of The  
Explanation Of Significant  
Difference (ESD)  
For The Record Of Decision For  
Installation Restoration  
Program Site 07  
Calf Pasture Point**

The Navy provides notice of an Explanation of Significant Difference (ESD) on the Record of Decision (ROD) completed for Site 07, Calf Pasture Point, at NCBC Davisville, Rhode Island. This notice is to inform interested parties that the schedule for the submittal of the Class 1 survey for 189 acres in Parcel 9, Zone 3, Calf Pasture Point, at NCBC Davisville in North Kingstown, RI, has been extended to 3 March 2000. The submittal was due 90 days from the signing of the ROD dated September 1999. The extension was requested because this type of survey requires more detail and documentation than typical surveying efforts at NCBC Davisville. No other FFA dates will be impacted by this change. The schedule extension request was made by the Navy in a letter dated 29 December 1999 and concurred by the U.S. EPA in their letter dated 5 January 2000.

The ESD documents a modification to the ROD for Site 07 that changes the submittal date for the Class 1 Survey, but does not fundamentally alter the selected remedy. This modification has been approved by the regulatory agencies, U.S. EPA and RIDEM.

The Standard-Times • Thursday, February 10, 2000 •

The ESD notice and supporting documentation will be placed with the Administrative Record for Site 07 and is available for public review at the Caretaker Site Office, 1330 Davisville Road, North Kingstown, RI and the information repository at the North Kingstown Public Library.
